### PROFESSIONAL SUMMARY

Computer Science and Engineering student and Full-Stack Software Development trainee with experience in JavaScript, React.js, Next.js, and foundational programming in Python, C, and C++. Familiar with REST APIs, backend concepts, Git/GitHub, and database fundamentals through coursework and projects. Highly motivated to develop backend development skills and learn .NET/C# through practical internship experience.

### TECHNICAL SKILLS

**Programming Languages:** Python, C, C++ — foundational knowledge

**Frontend:** JavaScript (ES6+), React.js, Next.js, React Router, HTML5, CSS3, Tailwind CSS, Responsive Design

**Tooling & Integration:** REST API Integration, Local Storage, Git, GitHub, Vercel Deployment

**Backend (Foundational):** Node.js, Express.js, MongoDB — developed through coursework and training, not yet applied professionally

**Currently Learning:** Continued backend development as part of full-stack training

### KEY PROJECTS

**EthioMarket** — *React.js E-Commerce Application, Tailwind CSS*

[ethio-market-nine.vercel.app](https://ethio-market-nine.vercel.app)

- Built a multi-page e-commerce interface with product listings, cart state management, and client-side routing using React and React Router.
- Structured reusable, prop-driven components to keep product, cart, and checkout views maintainable and consistent.

**BirrBudget** — *React.js Budgeting & Currency Application*

[birr-budget.vercel.app](https://birr-budget.vercel.app)

- Developed a personal budgeting tool that integrates a live external currency/exchange API to display real-time conversion data.
- Implemented state management for tracking budget entries and Local Storage persistence so user data survives page reloads.

**Country Facts Explorer** — *React.js REST API Application*

[country-facts-seven.vercel.app](https://country-facts-seven.vercel.app)

- Consumed the REST Countries API to fetch and render searchable, filterable country data across dynamic React components.
- Handled asynchronous data fetching, loading states, and error handling for a smooth, resilient user experience.

**Addis Eats** — *Next.js Restaurant Application, Tailwind CSS*

[addis-eats-psi.vercel.app](https://addis-eats-psi.vercel.app)

- Building a restaurant browsing application with Next.js and Tailwind CSS, focused on responsive, utility-first UI design.

### EDUCATION

**Mekelle Institute of Technology**

*BSc in Computer Science and Engineering*

CGPA: 3.87 / 4.00 | Currently on academic hold due to regional circumstances

**IBT College of Canada, Addis Ababa**

*Full-Stack Software Development Program (In Progress)*

### CERTIFICATIONS & TRAINING

- Backend Development: Node.js, Express, MongoDB & REST APIs — Coursera / Board Infinity
- Build a Webpage with HTML and CSS — Coursera / Board Infinity
- HTML, CSS and JavaScript Basics — IC Software Solutions
- AI/ML Training — 10 Academy

### LANGUAGES

**English** — Professional Working Proficiency | **Amharic** — Native | **Tigrinya** — Native
